Professional Summary

Junior full-stack developer and Computer Science student with hands-on experience in backend development, REST API design, and server-side applications using TypeScript (Node.js, Deno) and Python. Skilled in PostgreSQL, Docker, CI/CD, automated testing, Git, and Linux environments, with frontend experience in React, Next.js, and SvelteKit. Active open-source contributor and Community Lead of the Azerbaijan GitHub Community.

Experience

Founder & Full-Stack Developer - Omicron

Jun 2026 - Present

- Building a minimal, modern, self-hostable blogging platform with ActivityPub federation; backend on Deno, Hono, Fedify, Drizzle, and PostgreSQL with CI/CD via GitHub Actions.
- Developing the frontend with SvelteKit, bits-ui, Tiptap, and Tailwind CSS; Astro powers the docs and onboarding sites at docs.omicron.blog and join.omicron.blog.
- Developing REST APIs and frontend features with code review and testing; iterating on performance and self-hosting workflows.

Community Lead - Azerbaijan GitHub Community

Jan 2026 - Present

- Lead a local developer community focused on GitHub, open source, and developer education; organized community events and grew the GitHub organization.
- Maintain community website and initiatives with TypeScript and CI/CD, reviewing pull requests and coordinating contributors in an Agile workflow.

Member of Corporate Relations - ESTIEM LG Baku

Mar 2025 - Feb 2026

- Built corporate partnerships and managed communications through stakeholder and negotiation management.

Linux Developer - Cyber Security Platform / Turan Linux

May 2020 - Jun 2024

- Contributed to Linux distribution tooling and desktop packages, including work on Khazar/Turan Linux components and system utilities; packaged and tested builds for Debian-based environments.
- Worked with Linux environments, shell scripting, and open-source collaboration using Git and code review across a 4-year span.

Projects

Webmius - TypeScript, SSH. Web-based SSH management system for remote servers; REST API backend and Docker deployment.

Gazan - Python, GTK4, Linux. Desktop app for browsing and managing cloud files via rclone; GTK4/libadwaita interface.

Kagi Translate MCP - TypeScript, MCP, API. Model Context Protocol server exposing Kagi Translate to MCP clients with REST integration.

X to Mastodon Bot - JavaScript, API. Automation bot mirroring posts from X to Mastodon via REST APIs.

Skills

Proficient: TypeScript, Python, React, Next.js, SvelteKit, Node.js, Deno, Hono, Drizzle ORM, PostgreSQL, Docker, Git, Linux

Familiar: JavaScript, Ruby, Astro, Tailwind CSS, Express.js, Flask, Django, Bun, SQLite, Prisma ORM, GitHub, GitLab, Podman, Caddy, Anubis

Cloud & Hosting: Vercel, Netlify, Heroku, Hetzner (VPS), Cloudflare, AWS Amplify
